Evening Brief

Date: July 31st, 2021

Preparedness Levels & Great Basin Fire Activity (from WFDSS)

Great Basin	PL 3	Light Initial Attack Activity
National	PL 5	New Fires and Acres: 12 fires for 1.3 acres / 2,636 acres Large Fire Growth

Weather:

... Wet Thunderstorms Continue on Sunday ...

... Risk of Flash Flooding/Debris Flows with Heavier Rains over the Weekend...

... Drier and Warmer weather Returns Next Week ...

Wetter showers and thunderstorms are expected mostly area wide again on Sunday as monsoonal moisture continues to stream northward into the Great Basin. Heavy precipitation amounts are possible across the Great Basin Sunday, especially across Idaho, Utah and Eastern Nevada. Some drier spots where precipitation may not be as widespread may be Western Nevada and Wyoming. Showers and thunderstorms may continue overnight into early Sunday morning in Idaho. Showers and thunderstorms will linger over parts of Idaho, Wyoming, and Utah on Monday before drier weather spreads across the Great Basin.

Localized flooding and debris flows are possible in areas where heavy rain falls over recent burn scars.

Drier air pushes into the western half of the Great Basin on Monday, than to most areas of the Great Basin by Tuesday. Temperatures will warm with significantly lower humidity next week. A weak disturbance may bring a few thunderstorms to Idaho by mid-week, and some thunderstorm activity to eastern Utah later in the week, but otherwise mostly dry and warm weather is expected through the end of the week. Winds will also pick up mid-week along the Sierra Front and mid to late week in Idaho. This will need to be monitored as conditions dry out. Dry and breezy weather will increase the likelihood of holdovers and also increase fire behavior on existing incidents.

Fuels/Fire Potential:

.... Fuels and Fire Behavior Advisory in effect for Idaho, and Northern Portions of Both Utah and Nevada and Along the Sierra Front ...

Large fire potential will temporarily decrease through the weekend as deeper moisture spreads across the Great Basin. This moisture will at least temporarily lower fire danger in some areas for several days or longer. However, drier conditions will return to western areas by Monday and to most areas by Tuesday next week. Parts of Western Nevada and into Idaho that do not receive significant rainfall will dry out quickly by mid-week and will need to be monitored for holdovers and as thunderstorms or winds increase by mid-week.

Fuels in the southern half of the Great Basin have moistened significantly in most areas, with continued moistening in the coming days...with minimal large fire potential for the time being.

Resources:

Aviation within the Great Basin

- 0 VLAT, 2 LATs, 0 CL-415
- 25 SEATs, 0 FB, 9 AA, 1 ASM, 1 LP
- 9 Type 1 Helicopters / 9 Comm.
- 7 Type 2 Helicopters / 6 Comm.
- 18 Type 3 Helicopters / 11 Comm.

Crews Committed within the Great Basin

- 12 IHCs / 1 Available IA / 1 R&R
- 14 Type 2IA / 2 Available / 2 R&R
